Autobag 850S Bagging System

At a Glance

- Next-bag-out printing prevents product queuing and reduces waste
- Simple changeover
- Consistent, high-quality seals
- Control screen accesses operator tutorials, help system, on-board diagnostics, and performance monitoring
- Processor controlled servo motors, Ethernet-capable networking, and flexible mechanical design streamline integration
- Compact footprint minimizes floor space
- Simple height adjustment and casters for operator comfort and portability
- Easily integrates with third-party systems for mail order fulfillment applications

Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Mail Order Fulfillment Automated Bagging System for Large Bags

The Autobag 850S bagger is uniquely designed to provide enhanced packaging productivity for mail order fulfillment applications. Capable of running bags up to 22" wide, this system features a breakthrough bag opening technology that securely grips and holds the open bag in place. This creates a large, square opening (up to 11" x 11") that allows for easy loading of single or multi-line orders.

Next-bag-out printing is achieved with an advanced thermal transfer imprinter positioned directly over the next bag to be loaded. This ensures accuracy and efficiency in fulfillment applications that require frequent product and label changeovers, and prevents product queuing.

State-of-the-art engineering has resulted in a system that is inherently safe. The Autobag 850S eliminates the need for bulky guarding or devices required for safe operation. This unobstructed access makes loading ergonomic and improves operator throughput.

When used with genuine [Autobag pre-opened bags-on-a-roll](#), the Autobag 850S ushers in the next evolution of high-quality, reliable and flexible mail order fulfillment packaging, backed by the industry's most comprehensive engineering and field service network at Automated Packaging Systems.

User Benefits

Industry's widest bagger running bags up to 22" wide

High quality seals with coordinated seal flattener for wrinkle free seals

Continuous film control with a sophisticated tension control unit that centers and monitors the position of the film throughout the entire bagging process

Compact footprint minimizes floor space

Flexible machine that easily integrates with third-party systems

Simple height adjustment and casters for operator comfort and portability

Breakthrough technology with an advanced bag opening system to minimize bag size and facilitate multi-line orders

Easy loading modular bag storage shelf that speeds bag changeovers

Intuitive interface with AutoTouch Control Screen with access to operator tutorials, help system, on-board diagnostics, data retrieval, and performance monitoring with graphic or text-based views

Typical Applications

Single or multi-line mail order fulfillment

Prescription-by-mail fulfillment

Apparel

Fashion accessories

Sporting goods

Footwear

Bag Specifications

Film thickness: 1.09 to 4.0 mil

Width: 10" to 22"

Length: 10" to 36"

Pass-Through: Up to 11" (27.9 cm)

Bag Load Capacity: Up to 10 lbs (with load shelf)

Specifications of the Autobag 850S

Electrical: 110V to 240V VAC, 50/60 Hz

Power Consumption: 1800 Watts continuous

Air: 5 CFM/80 psi of clean, dry air

Weight: 590 lbs (267 kg)
