Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

High-Speed Bagging for Commercial Textile Services

The Autobag Ergocon Textile Packaging System is engineered specifically for high-speed packaging of industrial laundered applications and textile rental services. The laundry packaging system uses an automatic feeder, fully integrated with the Autobag AB 255 wide bagger, to inspect and package up to 7,000 towels per hour.

The inspection and packaging operation begins by loading the bulk feed bin with clean towels or other industrial laundered items. Loading can be done while the system is operating.

Items are automatically fed from the bin to the pick conveyor for separation, and are then conveyed to the inspection area. After inspection, towels continue down the conveyor, pass through a counting eye, and are automatically delivered to an open bag at the AB 255.

This commercial laundry equipment sets the pace of production. Speeds are adjustable to run slower for items requiring tighter inspection or faster to achieve high production rates.

The user-friendly control panel allows storage and recall of up to 14 jobs with load building capabilities, real time productivity data, onboard diagnostics, and more. Optional features include a performance indicating light stack, laser level control system, reject count system, and an extended 71" discharge conveyor.

When used with genuine [Autobag pre-opened bags-on-a-roll](#), the Autobag Ergocon Textile Packaging System offers high-quality, reliability and flexibility for the commercial laundry industry.

User Benefits

Reduce labor costs

Increase productivity

Improve inspection quality

Fast changeover of bag materials helps streamline operations

Sophisticated user-friendly control panel

Convenient workstation allows the operator to work sitting or standing, and without elevated platforms

Can run with or without an operator

Typical Applications

Industrial Laundry

- Shop Towels
- Gloves
- Mops

Healthcare

- Wash Cloths
- Pillow Slips
- Microfiber Towels

Food and Beverage

- Bar Towels
- Dish Towels
- Utility Towels

Bag Specifications

Film thickness: 1.32 to 4.0 mil

Width: 2" to 24"

Length: 3" to 18.75"

Specifications of the Autobag Ergocon Textile Packaging System

Electrical: 110VAC

Air: 5 CFM/80 psi of clean, dry air

Length: 223.1875"

Depth: 91.1875" (232 cm), 130.5" (332 cm) with extended conveyor

Height: 61.75" (157 cm)

Feed Bin Weight Capacity: 250 lbs (110 kg)

Standard Discharge Conveyor: 43.375" (103 cm)

Extended Discharge Conveyor: 71.875" (183 cm)
