Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Table Top Bagging with Next Bag Out Printing

The Autobag PaceSetter PS 125 and PS 125 OneStep Tabletop Baggers are specifically designed to bring simplicity, versatility, quality and value to hand load packaging applications.

Operating at speeds up to 25 bags per minute (15 BPM OneStep version), the PS 125 bagging systems offer innovative engineering in a simple, tabletop design. The PS 125 features a small footprint of 22 x 19 inches, and weighs just 82 pounds. The quiet, all-electric design does not require compressed air to run, making the unit highly adaptable in any low- to mid-volume production environment.

The PS 125 is simple to operate, with a user-friendly display that enables easy access to operating parameters, job set-up, job storage, and on-board system diagnostics. The unique, locking turntable combines with the AutoThread feature to provide ergonomic handling and changeover of Autobag bags-on-a-roll. Bags are automatically indexed, loaded by hand, then sealed using the Push-to-Seal function, a standard footswitch, or via automatic cycle control.

The PaceSetter PS 125 OneStep includes the same conveniences of the standard PS 125 with the addition of a built-in PH 412 imprinter. Featuring next-bag-out printing technology that is ideal for short run and order fulfillment applications, the PS 125 OneStep is capable of printing high resolution graphics, text and bar codes directly on the bag, eliminating the need for a separate labeling operation. The printer

features a tilt-back print head for easy maintenance, and the optional AutoLabel label design software simplifies label creation.

Benefits

- All-electric system does not require compressed air to run
- Compact design is ideal for low- to mid-volume packaging operations
- Locking turntable and AutoThread feature provide easy bag access and changeover
- Open loading area and controlled seal bar maximize loading flexibility and operator safety
- Automatic or manual operating modes for optimum flexibility and productivity
- Stores jobs for later recall using operator-friendly controls
- On-board system diagnostics simplify maintenance and maximize productivity
- Next-bag-out printing feature ensures greater accuracy and eliminates product queuing in order fulfillment applications (OneStep)
- Capable of printing high resolution graphics, text and bar codes directly on the bag (OneStep)
- Tilt-back printer head for easy maintenance (OneStep)

Typical Applications

- Automotive & appliance parts
- Hardware & DIY
- Electrical & electronic
- Plumbing & heating
- Hobby & craft
- Product fulfillment
- Jewelry & novelty items
- Cosmetics & beauty aids
- Disposable health care
- Mail order fulfillment
- Ecommerce fulfillment
