Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Bagger Streamlines Product Bagging

The compact tabletop QuantumPak QB-10 automatic bagging machine streamlines manual packaging processes. This bagging system reduces operator workload, and minimizes repetitive manual operations. An intuitive interface with minimal setup simplifies the bagging process right out of the box.

The QuantumPak QB-10 adapts effortlessly to a variety of packaging production needs. Operate by footswitch, push-to-seal, or automatic cycle. This automatic bagger provides single-bag and continuous-bag modes, and includes built-in output statistics for both individual and total production counts.

A unique sealing system with preheat time control delivers clean, strong, and visually appealing seals. Patented SparkSensor technology provides precise bag length detection to ensure accurate, consistent sealing every time.

Optional Printer

The QuantumPak QB-10 can be equipped with an high-quality printer for efficient, accurate, and reliable bag coding and marking.

Bags a Wide Range of Products

The QuantumPak QB-10 is ideal for bagging a wide range of products.

Medical devices

Aviation components
Food and snack packaging
Electronic parts
Hardware
Apparel
Many more

Features
