Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Automatically Convey Bags Away from the Bagger

The Autobag Takeaway Conveyor improves the productivity of packaging operations by simply moving filled bags from the packaging location up to bench height, or to another location.

Designed to maximize available space, the Takeaway Conveyor is a continuous motion conveyor designed to accommodate most bag packaging applications.

The Takeaway Conveyor has a low profile and is available in four different angles of incline that allows it to integrate easily with Autobag baggers and bag packaging equipment.

User Benefits

Flexible and fully adjustable

Saves time by enabling operators to have more time packing and less time moving finished product

Improves work environment by conveying the product to bench height, which reduces the need to pick product from filled bins

Low profile design maximizes existing work areas with limited space

Typical Applications

Any bag packaging station to move completed packages from the bagger to a tote, master pack, or sorting table

Specifications

Electrical: 110V, 60 Hz, 600 Watts

Conveyor Length: 20" horizontal by 40" incline (51 cm x 102 cm)

Belt Type: 2M8 NO-US PVC

Belt Width: 12" (31 cm)

Belt Speed: 26 feet per minute, fixed

Available Angles: Standard 45 degree fixed configuration, can be custom made in other angles
