Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Fully Automatic Blister Sealing Up to 22 Cycles per Minute

Starview FAB4 Series fully automated rotary type blister sealing machines are ideal for cellular manufacturing or JIT production. With the proper conditions, these machines are capable of up to 22 cycles per minute in production.

The FAB Series automated rotary blister sealing machines are built with the capability to feed blisters, blister cards, and discharge finished packages when proper tooling is installed.

These machines may be used for conventional carded blisters, full face blisters, and half-clamshell styles.

The FAB4 blister sealers are available with sealing areas of 10" x 12" and 12" x 16".
