Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Fully-Automatic Carousel Medical & Pharmaceutical Blister Packaging

Starview BSC/PH Series carousel type heat sealers are designed for medium to higher volume production requirements where automatic feeding and unloading is desired.

These heat sealing machines are used for conventional carded blisters, full face blisters and half-clamshell styles - as well as applications using medical paper, Tyvek, foils and other heat sealable lidstock.

Starview BSC/PH blister sealing systems are available in 16 and 20 station designs.

Models are available in standard sealing areas of 14 x 18 inches and 18 x 24 inches. Larger sealing areas and customization of componentry are available on request.

Features

A wide range of standard and custom features available to match customer requirements.

Generous use of stainless steel and powder coated steel in the structure for the most durable finish in the industry.

Color touch screen HMI for the ultimate in operator convenience and accessibility. Includes storage for 99 databases and on-screen data tracking.

A Starview exclusive remote access via standard Ethernet hardwire or optional Wi-Fi router gives management access to real-time process information from the machine.

On-screen temperature calibration standard with optional on-screen pressure calibration available to simplify validation using direct access validation ports.

Precision indexing inline conveyor for precise sealing fixture to matching relieved face plate alignment.

Ultra-high pressure sealing presses used in conjunction with matched aluminum tooling to give consistent sealing patterns with any heat sealable medical lidding materials. Hydro-pneumatic press available for cold seal materials.

Industry leading design, construction, features and customer support.
