Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Table Top Manual Shuttle Medical & Pharmaceutical Packaging Machine

Starview SB/PH1-1012 single-station table-top manual shuttle type heat sealers are designed for product development and package sampling. These manual shuttle medical sealing machines have a single sealing area of 10 x 12 inches. Tooling for these machines can be configured to produce medical and pharmaceutical package styles including Tyvek, foils and medical papers heat sealed to PETG or HIPS trays as well as typical wallet packs for clinical trials or controlled dosage.

Features

A wide range of standard and optional features available to match customer requirements.

Economical table top machine for clean room or laminar flow hood operation to produce production equivalent prototype and sample packages.

Generous use of powder coated steel, stainless steel and polycarbonate in the structure for the most durable finish in the industry.

Temperature and pressure validation using optional direct access ports for ease of connection.

High pressure sealing press used in conjunction with matched aluminum tooling to give consistent sealing patterns with any heat sealable medical lidding materials.

Industry leading design, construction, features and customer support.

Please [contact Pro Pac](#) or call 888-318-0083 for your blister sealing equipment.
