Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Manual Shuttle Medical & Pharmaceutical Packaging Machine

Starview SB/PH1-1418 single-station floor model shuttle type heat sealers are designed for small to medium volume production requirements. These machines are specifically designed for medical applications using foils, medical paper, Tyvek and other heat sealable lidstock. These high-quality machines are ideal for start-up companies, back up equipment, cellular production lines, or low-volume in-house packaging.

SB/PH1-1418 medical sealing machines are single operator shuttle type sealers utilizing quick-change sealing fixtures.

Features

A wide range of standard and custom features available to match customer requirements.

Generous use of stainless steel in the structure for the most durable finish in the industry.

Color touch screen HMI for the ultimate in operator convenience and accessibility. Includes storage for 99 databases and on-screen data tracking.

A Starview exclusive remote access via standard Ethernet hardwire or optional Wi-Fi router gives management access to real-time process information from the machine.

On-screen temperature calibration standard with optional on-screen pressure calibration available to simplify validation using direct access validation ports.

Ultra-high pressure sealing presses used in conjunction with matched aluminum tooling to give consistent sealing patterns with any heat sealable medical lidding materials.

Industry leading design, construction, features and customer support.
