Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Fully-Automatic Roll Fed or Sheet Fed Thermoforming

Starview FOM vacuum forming machines are fully-automatic, roll fed or sheet-fed. These reliable machines include a radiant heater panel oven for maximum heat penetration, automatic out-feed, and a finished sheet guillotine cut-off system.

FOM Series vacuum formers can be equipped with optional features such as a sandwich (upper and lower) heater system operated dependently or independently above and below the film.

Additional options include male/female mold capability, an inline automatic pre-heat station, an automatic plug/grid assist that is adjustable from the touch screen, as well as adjustable film width.

Features of FOM Vacuum Formers

Complete PLC machine control with color touch screen operator interface

Fully automatic, roll fed with adjustable guillotine sheet cut-off

Optional plug/grid assist adjustable from touch screen

High-efficiency radiant panel heating elements for maximum heat to film while conserving energy

Heater oven zoned for uniform heating of film

High-powered cooling blowers to reduce process time

Please [contact Pro Pac](#) or call 888-318-0083 for your thermoforming equipment.
