SAT Semi-Automatic Vacuum Forming Machine

At a Glance

- Ideal for mold sampling and short production runs
- Vacuum forming machine utilizes roll fed or sheet-fed film
- Radiant heater panel oven for uniform heating and maximum heat penetration
- Complete PLC machine control with touch screen operator interface
- Heavy-duty industrial design

Buy your thermoform film from us, and get a discount on this Starview thermoforming machine!

Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Perfect for Thermoformed Mold Samples and Short Runs

Starview SAT Series vacuum forming machines utilize roll fed or sheet-fed film and include a radiant heater panel oven for uniform heating and maximum heat penetration. Cooling blowers to remove heat from the film are standard. The SAT Series machines are ideal for mold sampling and short production runs.

These vacuum formers can be equipped with optional features such as a sandwich (upper and lower) heater system operated dependently or independently above and below the film. A water-cooled mold base is available to increase cycle speeds. An automatic plug/grid assist is available to pre-stretch the film on deep female molds or tall male molds.

Features of the SAT Vacuum Forming Machines

Complete PLC machine control with touch screen operator interface

Semi-automatic, roll or sheet fed

High efficiency radiant panel heating elements for maximum heat to film while conserving energy

Heater oven zoned for uniform heating of film

High powered cooling blowers to reduce process time

Please [contact Pro Pac](#) or call 888-318-0083 for your thermoforming equipment.
