Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Run and Seal Cartons Vertically with Opening Face Up

The Adco VRC Vertical Rotary Cartoner is ideal for space-conscious facilities that require a vertical load cartoner. The VRC uses a rotary starwheel with no-tool changeout pockets to quickly changeover.

The VRC can be configured to accept product from liquid bag fillers, scales, or from a robotic handling system. With its space-saving footprint and flexible design, the VRC is ideal for pharmaceutical and cosmetic packagers.

Like all Adco machines, the VRC is constructed out of stainless steel.

Benefits

Stainless steel construction improves cleanability and eliminates corrosion

Uses gravity to help load product faster & more efficiently

Ideal for filling large cartons with product that is best loaded vertically

Flexible design minimizes changeover time and protects investment as products change

Features

Stainless steel construction

Compact design with casters and adjustable leveling feet

Star wheel with quick changeout size pockets

Orbital pre-break carton feeder

72" long horizontal powered carton magazine

Uses gravity to help load product faster & more efficiently

Allen-Bradley PLC control package

Nordson ProBlue FLEX hot melt glue system (when glue is specified)
Quick adjust levers and scales on all adjustments
Many options available upon request
