Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Wrap-Around Cases at 25 per Minute

The Arpac PC-2500 is a continuous motion wrap-around case and tray packer capable of reaching speeds of up to 25 cases or trays per minute. The PC-2500 uses up to 20% less corrugated material as compared to regular slotted cases (RSCs) resulting in significant annual material savings.

This rugged machine reduces labor, increases productivity, reduces packaging costs and integrates easily into new or existing packaging lines. The Arpac PC-2500 works well with metal cans, paper cans, glass jars, glass bottles, plastic jars and plastic bottles.

The system collates the products, loads the corrugated cases or trays and closes them with hot-melt glue.

Features of the PC-2500

Speeds of up to 25 cases and trays per minute

Uses up to 20% less corrugated material as compared to regular slotted case (RSC)

Works well with metal cans, paper cans, glass jars, glass bottles, plastic jars and plastic bottles

Provides tight packages minimizing the need for partitions while protecting glass containers from damage

Options allow for automatic insertion of partitions/dividers for the ultimate in product protection

Easily adjusts to varying product sizes, speeds and product patterns

Runs trays and wraparound cases

Options

Wrap-around tray kit
Servo changeover
Servo lane divider
Partition inserter

Machine Specifications
