Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Semi-Auto Case Former Attaches to Little David Case Tapers

The Little David CF-5 is a semi-automatic case former designed to fold and hold all bottom flaps of RSC corrugated boxes presented to it by an operator.

This low-cost machine has an ergonomic design and accommodates a wide range of boxes. The CF-5 is PLC driven and requires no lubrication. Slide and lock legs adjust to meet most conveyor heights.

This machine can be used alone or with a case sealer as part of a packing / sealing station to improve productivity.

The CF-5 improves productivity by eliminating the extra labor needed to setup cases for loading. It also improves safety and reduces costly repetitive injuries.

Attachment kits are available for the LD-7, SP-304, Uniform Legend, and other case sealers in the industry.

Features

PLC driven

Up to 6 cases per minute, depending on operator dexterity

Large box range

Ergonomic design

Heavy-duty steel construction

Works with virtually any sealer

Plug in operation

Minimal operator training required

Alleviates twisting motion known to cause carpal tunnel syndrome
Slide and lock legs
PLC driven
No lubrication required

Options

Spare parts kit
Special electrics
Custom color
Casters
