Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Adjustment Free Stainless Steel Semi-Auto Case Former for Harsh Environments

The stainless steel CF-5AF economical semi-automatic case former has an ergonomic design and accommodates a wide range of boxes. The CF-5AF requires no adjustment as you change case sizes. Once the box is formed, it is held in place to allow the operator to pack the product into the case. The full case can then be pushed into virtually any case sealer for top and bottom sealing.

Food processing operations that take extra precautions to eliminate bacteria and other foodborne pathogens can pair it with the Little David LD-Xss washdown case sealer for the ideal sanitary form, pack and seal solution.

Features

- Stainless steel for wash down and harsh environments
- Ideal for case forming and packing that requires frequent case changeover
- Economical: 40% lower cost than Little David CF-5 semi-auto case former
- Heavy duty construction
- Simple design
- Requires little maintenance
- Minimal operator training
- Can be operated on either side
- Up to 9 cases per minute
