Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

## Stainless Steel Semi-Auto Case Former Built to Handle Harsh Environments

The stainless steel CF-5 semi-automatic case former is built to handle harsh environments and wash down applications. It features the same ergonomic design and box range as the standard CF-5.

The Little David CF-5 is a semi-automatic case former designed to fold and hold all bottom flaps of RSC corrugated boxes presented to it by an operator.

This low-cost machine has an ergonomic design and accommodates a wide range of boxes. The CF-5 is PLC driven and requires no lubrication. Slide and lock legs adjust to meet most conveyor heights.

This machine can be used alone or with a case sealer as part of a packing / sealing station to improve productivity.

The CF-5 improves productivity by eliminating the extra labor needed to setup cases for loading. It also improves safety and reduces costly repetitive injuries.

Attachment kits are available for the LD-7, SP-304, Uniform Legend, and other case sealers in the industry.

## Features

PLC driven

Up to 6 cases per minute, depending on operator dexterity  
Large box range  
Ergonomic design  
Heavy duty steel construction  
Works with virtually any sealer  
Plug in operation  
Minimal operator training required  
Alleviates twisting motion known to cause carpal tunnel syndrome  
Slide and lock legs  
PLC driven  
No lubrication required

## Options

Spare parts kit  
Special electrics  
Custom color  
Casters

## Case Dimensions

Length: 8" - 26.5" (203mm - 673mm)  
Width: 5" - 20" (127mm - 508mm)  
Height: 3" - infinite (76mm - infinite)

## Machine Dimensions

Width: 44" (112 cm)  
Depth: 34" (86 cm)  
Height: 33" (84 cm)

## Specifications

Electrical: 110 VAC, 60Hz, Single phase, 2 Amps (other voltages available)  
Air: 6.5 SCFM
