## Seal Four Case Edges in a Wet Environment

The BestPack AT4E-L operator-free case sealer automatically applies pressure sensitive tape to four outer edges of cartons. The AT4E-L is designed to eliminate costly hand taping of the four outer edges where pilfer-proofing and protection of your product is necessary.

The AT4E-L stainless steel model is designed for uniform edge sealing applications where there is a wet environment. These case tapers are designed with an automatic front side feed 90 degree box turn.

All BestPack stainless steel sealers are made with food grade 304 stainless steel for 21 CFR 110 compliance and include 304 high-speed stainless steel tape heads. Units are available for either splash resistant or wash-down applications. This unit is also available in standard finish.

## Features

Heavy-duty 3mm welded 304 food grade stainless steel frame including upper welded legs.

Seals all four outside carton edges including all corners.

In-line 90 degree carton turner.

Four belt drive system with 1-piece molded belts and V-belt guide.

Top and bottom four 3" pop-out BestPack high-speed 304 stainless steel tape heads.

Low tape / no tape on carton / no cut sensors with malfunction alarm and three color light.

Motor drive uniform height adjustment.

Heavy-duty upper assembly four post system.

Heavy-duty maintenance free oil-less air cylinder.

Aluminum framed interlock safety gates where needed.
