Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Bottom Flap Folder and Tilted Packing Station

The BestPack MBF-T bottom flap folder and packing station has a rotating/tilting bed that closes the bottom flaps and holds the carton in a tilted position while the operator fills the carton. The operator activates a switch that causes the packing station to rotate to a standing position. The operator then pushes the carton to the next station.

The ergonomic design of the tilting bed provides a better packing angle for the operator.

The MBF-T is a great addition to BestPack carton sealers and provides a total packing line solution.
