Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

## Quad-Belt Drive Provides Carton Stability and Effective Sealing

The BestPack MSAG is a semi-automatic uniform tape carton sealer. This MSAG sealer is designed for unique applications where the sealer needs to place two strips of tape on the top of the carton - even out to the top edges of the carton - and seal in the center of the carton on the bottom. Ideal for agricultural products.

The upper assembly and bottom assembly can accept center seal with 2", 3" and 6" tape heads, or double sealing the top of the carton that can be accomplished with either 2" tape heads or 3" tape heads. A top 3-flap folder and front extended side belts are included.

BestPack MSAG incorporates 2", 3", and 6" high speed pop-out pressure-sensitive tape heads with BestPack's patented tab adjustment.

All BestPack units are available in standard baked enamel finish and food grade 304 stainless steel for 21 CFR 110 compliance.

## Features

Semi-automatic uniform carton sealer.

Extended side belt drives.

Top 3-flap folder.

Adjustable acme screw drive upper assembly that allows for top center seal, or splits apart for double taping on top even out to the outside edges of the carton.
