Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Separate and Time Boxes into a Case Sealer

The BestPack ARX uniform case indexer is perfect to place in front of the BestPack AS or AQ fully automatic uniform case sealers. The ARX case indexer separates and times cartons into the sealer to insure proper top flap folding and sealing of cartons with no jamming.

The BestPack ARX timer controls the spacing between the cartons by controlling the duration of the drop and stop. This timing controls the speed of cartons being fed down line to equipment as label printers and palletizers. The ARX is the strongest and most positive indexing system in the market.

All BestPack units are available in standard baked enamel finish and food grade 304 stainless steel for 21 CFR 110 compliance.

Features

Heavy-duty 2mm welded steel frame.

Two motor drive roller conveyors.

Two section powered rollers - front section with drop and stop feature for positive carton separation.

Adjustable timer for carton space separation.

Heavy-duty maintenance free oil-less air cylinder.
