Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Taping Extra Large Cases

The Eastey SB-TB-2 top and side belts are built for oversized, heavy-weight cases that are too large for most case sealing equipment.

The Eastey SB-TB-2 case taper offers the quality that you have come to rely on from Eastey. The taper's unique and simple design has proven to be one of the most reliable case tapers on the market today, keeping production and maintenance efforts to a minimum and providing fast and efficient alternatives to hand taping.

The SB/TB offers fast and easy case changes and flexibility for boxes 4.75" in length and greater. Adjustments can be made on the fly with easy hand tighten knobs and cranks. The SB/TB utilizes Easy-Taper Quick-Load top and bottom tape cartridges and will seal boxes as large as 27.5" wide x 27.5" tall, offering the user more options for their case taping operation.

Four drive belts work in unison to effectively move your cases through for a strong and consistent seal. The SB-TB-2 utilizes a dual mast with twin lead screws for greater tape head stability, and an adjustable side belt drive to center each case. The unit also features top compression rollers to stabilize the case and push the top flaps together, making it a great solution for over-filled and over-sized cases.

Industrial Strength Operation

Dual 1/4 HP side drive motors with single top drive motor, aggressive industrial strength drive belts, and roller tables make SB-TB-2 a workhorse that will stand up to your toughest challenges. Each case taping

machine is made from 12 gauge steel that will withstand even the most rugged applications. A powder coated exterior protects the machine from abusive conditions and ensures years of use. The SB-TB-2 is CE certified, so users can be confident it will consistently provide reliable, high quality case sealing.

Features

- Plug-in and go operation
- Fast and easy box size changes
- Industrial strength side belts
- Interchangeable top and bottom tape cartridges
- Emergency stop button
- Adjustable leg extensions
- Casters for transportation within plant
- Front and rear pack tables to allow for case packing
- Top squeezers push top flaps together for accurate case sealing
- Powder coated 12 gauge steel
- Low maintenance, no air required

Case Sizes

Minimum: 4.75"L x 7"W x 4.7"D

Maximum: Infinite L x 27.5"W x 27.5"D

Options

3" tape head accepts 3" wide tape rolls
