Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Efficient Case Taping with Quick Release Belts

The Little David LD-X combines versatility and ease-of-maintenance to maximize operational efficiency. The highlight of the LD-X is the patent pending quick-release drive belts which allow the belts to be changed, without tools, in a matter of seconds.

The LD-X can be converted to handle both 2" and 3" tape, and can be converted to run mirror image in the field. These features give users the versatility they require to move the sealer from line to line regardless of product flow direction or necessary tape size.

Interlocking side rails and a counterbalanced head adjustment ensures that changover is always quick and easy. Heavy-duty tubular steel construction provides the long-lasting performance users demand.

Features

Quick release drive belts change in less than 3 minutes

2" to 3" tape conversion in field

Easy access motor mounts allow for fast changover

Simplified set-up from pallet to production in less than 10 minutes

Mirror image changover in field to change product flow direction without costly custom modifications

Options

Recommended spare parts kit

Spare tape cartridge
3-Phase motor (any voltage)
Top squeezers
Front and rear pack tables
Casters

Reliable Performance Warranty

1 year all components
2 year warranty for gear reducer and motor
3 year warranty for tape cartridge
(Moving and wear parts are not included, other restrictions may apply)
