Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Maintains Product Orientation through the Curve

The Roach Smart MDR Curve is an accumulating conveyor driven by the same 1.9" diameter MDR found in the Smart MDR Straight Accumulation conveyor. This drive roller is mounted inside the frame and powers the 2.5" tapered tread rollers, making it possible to maintain product orientation throughout the curve.

The Roach Smart MDR Curve conveyor features motorized driven rollers (MDR) and controllers from Itoh Denki.

The Itoh Denki controllers are available in programmable or fixed formats capable of handling simple to complex systems and are easily modified for future growth. This state-of-the-art, programmable technology makes zone-to-zone and product control simple through Ethernet/IP communication.

Please [contact Pro Pac](#) or call 888-318-0083 for your conveyors.
