Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Maintains Product Orientation through the Curve

The Roach MDR Gate conveyor is designed to allow temporary access through conveyor lines. This gate features the same 1.9" motorized driven rollers (MDR) and controllers from Itoh Denki found in the Roach Smart Conveyor line.

The MDR Gate conveyor is designed with programmable or fixed controllers from Itoh Denki to work seamlessly incorporated within Roach MDR Smart Conveyors.

The Itoh Denki controllers are available in programmable or fixed formats capable of handling simple to complex systems and are easily modified for future growth. This state-of-the-art, programmable technology makes zone-to-zone and product control simple through Ethernet/IP communication.

Please [contact Pro Pac](#) or call 888-318-0083 for your conveyors.
