Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Mass Accumulation Ideal for Rounded Products

Shuttleworth mass product accumulation and buffering systems combined with their Slip-Torque surface is ideal for rounded products with ability to nest.

The low back pressure from the Slip-Torque surface and nesting of rounded products enables you to use the entire conveyor surface, maximizing your system capabilities while maintaining your product integrity. Devices are available to help spread products across the conveyor for applications requiring a wider conveyor bed.

Complete your accumulation or buffering process with solutions to merge your products to a single lane for the next manufacturing or packaging process.

Please [contact Pro Pac](#) or call 888-318-0083 for your product handling equipment.
