Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Meter, Index and Position Products

Shuttleworth metering, indexing and positioning systems space out products for machine feeding, line control or robot picking.

Whether you need to automatically feed product into a shrink wrapper, cartoner or just need to evenly space your product for the next line process, Shuttleworth's metering solutions provide the handling accuracy and efficiency you need.

Shuttleworth product brakes and pushers can be mounted within the surface or to the side frame depending on your application. Shuttleworth Slip-Torque conveyor surface can also be configured to space or justify products to your applications needs.

To strictly indexing or metering to feed products to a shrink or flow wrapper, cartoner, or case packer, Shuttleworth's versatile line of SmartFeeds make indexing quick, easy and productive. Shuttleworth variety of flexible SmartFeed options include the Servo SmartFeed, Multi-Pack SmartFeed, Gated SmartFeed, and the High-Speed Gated SmartFeed.
