# Shuttleworth Robot Ready Solutions

## At a Glance

- Precise product positioning and pattern forming
- Perfect for robotic pick-and-place applications
- Improve product presentation and cycle times

## Pricing

Call us at 888-318-0083

Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

## Precise Product Positioning and Pattern Forming

Shuttleworth low back pressure surface, custom devices with precise positioning and pattern forming capabilities are perfect for robotic pick-and-place applications.

Shuttleworth systems integrate with robotic systems to create automated solutions for automotive, electronics, food & beverage, healthcare/ pharmaceutical, paper, personal care, printing & binding, and solar energy industries.

Having challenges making rate? Seem to require a larger robot due to product back pressure? Shuttleworth's low back pressure conveyor and staging process can improve product/part presentation and lower cycle times enabling the use of smaller and/or fewer robots for many automated processes.

Shuttleworth product handling solutions meet specific industry challenges and needs – providing improved profitability to the end user through creative and cost-effective solutions.

## Features & Benefits

Low friction surface protects robot end of arm tooling when interfacing

Pattern forming for multi-pack capabilities and more products per pick reduces cycle times

Gentle product handling

Specialty devices and options available for better product presentation

Configurable conveyor surface for irregular products

Optimize assembly, case packing, machine tending and palletizing processes

Reliable solution requiring low maintenance
