Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Dynamic, Continuous Motion Accumulation

Shuttleworth Express conveyor units feature Shuttleworth's Slip-Torque surface and offer a substantial savings and shorter lead time over custom designed systems.

Shuttleworth's Slip-Torque technology supplies transportation and accumulation with minimal line pressure, preventing product scuffing, jamming, or shingling.

All Shuttleworth Express conveyors are chain driven and manufactured from standard designs and stocked components. Special engineering and/or fabrication are not required. Available in 14 common widths and 11 lengths, Express conveyors accommodate many industry applications. Each unit is fully assembled, tested and inspected prior to shipping and comes with a one-year warranty on all conveyor components.

Features & Benefits

Low back pressure surface prevents product crushing and jamming or overfeeding of integrated packaging machinery

Variety of lengths and widths available

Slip-Torque low friction surface protects products from scuffing and marring damage

Standard design and manufacturing enables shorter lead times for orders

Extruded aluminum frame and heavy-duty painted cold-rolled steel tube legs provide a sturdy, durable and dependable construction design

End stop, guides and drive options available

Additional discount for purchases of three or more units
