Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

## Safely Transport Heavy Machine Parts

Shuttleworth Mach-Trak heavy-duty conveyors are ideal for feeding and transporting between machine centers and other applications where precision metal parts are being created.

Designed for automotive and aerospace industries, Shuttleworth Mach-Trak conveyors feature a heavy-duty formed painted metal frame and an open surface roller chain track. Rollers making up the chain offer low-friction part handling to avoid scuffing and other damage. This Mach-Trak design provides the same product handling properties as Slip-Torque while also able to transport heavier products than other Shuttleworth frames.

## Features & Benefits

- Open access from below
- Handles heavier products than Slip-Torque
- Products guided by track with an open center allowing debris to fall through to a catch tray
- Built for harsh environments
- Conveys heavier products gently
- Can integrate with robotic cells and gauges

## Ideal Industries & Applications

- Automotive
- Aerospace
- Machining centers / cells

Heavy products

## Specifications

Available Drives	Chain
Roller Chain Size	Size 40 (1/2-inch pitch)
Lengths	Custom
Widths (Conveyable Surface)	Custom
Environment	Harsh, Hot
