Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Stainless Steel Conveyor for Heavy Washdown Applications

Shuttleworth Easy Clean 1000 stainless steel conveyor frame options are designed for heavy washdown applications.

The stainless steel bolt-together frame has innovative 30 and 60 degree steel strength bends or "hems." The elimination of 90-degree steel bends allows contaminants to fall through the conveyor. Solid faced roller surfaces and loose roller spacing reduces the possibility for particle collections. These features simplify and expedite the cleaning process.

The entire system including the motor assembly is designed for thorough food process cleaning. The roller spacing allows for easy access with either hot water or air pressure. Solid faced roller surfaces reduce possibilities for particle collection.

Features & Benefits

Easy to clean and maintain

Heavy, high-pressure and caustic washdown

Angled bends allow debris to fall through the surface and frame structure - eliminating any collection on the horizontal surface

Sanitary design meets USDA, FDA and bakery environments for sanitary requirements

Fabricated with continuous welds throughout

Corrosion resistant parts

Can be customized with Shuttleworth devices and options per application requirements
Can be easily integrated into current automation system

Ideal Industries & Applications

Open food trays and containers
Pharmaceutical
Beverage
Baking

Specifications

Available Drives	Chain
Available Roller Sizes	17 mm, 21 mm, 32 mm
Lengths	Up to 3000mm
Widths (Conveyable Surface)	120 mm (4.7"), 188 mm (7.4"), 256 mm (10.1"), 324 mm (12.7"), 392 mm (15.4"), 460 mm (18.1"), 528 mm (20.8"), 596 mm (23.5"), 664 mm (26.1"), 732 mm (28.8"), 800 mm, (31.5"), 868 mm (32.1"), 936 mm (36.8"), 1004 mm (39.5"), & Custom
Environment	Heavy washdown, caustic washdown
