## Pricing

Call us at **888-318-0083**

Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

## Easily Customize a Perfect Product Handling System

Shuttleworth's Slip-Torque roller technology allows for customization and integration. Within a single frame, systems can be designed with options including multi-lane, open center, reversing and bi-directional capabilities. The segmented roller surface also allows for a fully-customized surface down to the roller for a product application.

Slip-Torque conveyors can also be integrated with custom devices and options to create your own engineered product handling solution. The inherent design allows for some devices to be built within the conveyor surface, seamlessly integrated without the need for additional drives or conveyors. Devices and surface configuration can be determined by the functional requirement of the application.

Please [contact Pro Pac](#) or call 888-318-0083 for your product handling equipment.
