Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

## Elevate Your Products with a Minimal Footprint

For elevation change with a minimal footprint, SpanTech spiral elevator conveyors are ideal.

A cost-effective solution for changing elevations, SpanTech OutRunner spiral elevator conveyors give you the capacity to move several product types without taking up valuable floor space.

These cost-effective, compact units are not only strong, but gentle as well. No pressure is applied to the product, so even delicate items can pass through it without damage.

## SpanTech Spiral Elevator Advantage

The SpanTech OutRunner spiral elevator is driven by a single gearmotor, and each 360-degree revolution is individually driven. Rather than trying to drive all of the chain from one end, the design of SpanTech spiral conveyors allows each tier to share the load, offering many advantages including great flexibility in loads, speeds and incline angles.

## Spiral Conveyor Features

Can be equipped with moving side guide links on one or both sides of the chain.

Different orientations between the infeed and outfeed are available as a standard.

Speeds up to 250 fpm (76.2 mpm).

No controls necessary.

Handles a wide range of products with no adjustments.

Applications include: elevating, cooling, curing, time delays.
