Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Securely Move Your Product Vertically

SpanTech wedge conveyors provide vertical movement in a compact, all-mechanical design for the ultimate reliability.

These almost-silent conveying systems are designed with all-mechanical movement that grabs products on the sides and securely carries them on their way.

SpanTech wedge conveying systems can be configured to handle almost any product size or weight in a wide variety of chain types and widths to accommodate a large array of products.

Wedge Conveyor Features

Variable speed ranges.

Extremely small footprint compared to elevation change.

Elevation of up to 30 feet or more.

No computers, logic or software components needed.

Available in powder-coated or stainless construction.

Choice of standard positionable or fully adjustable unit.
