Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

## Easily Access the Inside of Your Closed Loop Conveyor System

Easily access the interior of your closed loop conveyor with a SpanTech lift gate. When personnel or equipment require access to the interior of a closed conveyor loop, a lift gate can be the solution.

The SpanTech lift gate is a counter-weighted or spring-loaded conveyor section, hinged to allow it to be raised and lowered as needed. It is designed to safely remain in the up position after being raised, until it is intentionally lowered.

The lift gate's conveyor section can be slave-driven from the preceding conveyor, if desired.

## Lift Gate Features

Conveyor section can be slave-driven from the preceding conveyor.

Gate safely remains in the up position after being raised, until it is intentionally lowered.

Counterweighted or spring-loaded conveyor section.

Hinged to allow it to be raised and lowered as needed.
