Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Improve a Cracker Cooling Conveying System

Change product orientation without the use of external devices. SpanTech twisted conveyors make product reorientation simple.

SpanTech twisted conveyors can be used for easy and foolproof product reorientation, or to precisely align items as required for downstream processes. Products can be reoriented by any angle up to a full 90 degrees, depending on the specific need.

If a conveyor is twisted along the axis of the side frame, the product will maintain the same elevation. If the twist is along conveyor's center line, a natural decline of the product will occur.

Features

Rotate products 90 degrees in only 60 linear inches.

Reorients the product with no additional automation and no disruption in conveyance.

60 rods = 90 degrees of twist.

Can also be used for slight incline and decline applications.

Please [contact Pro Pac](#) or call 888-318-0083 for your conveyor systems.
