Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Flow Wrapper with Advanced Technology and Easy Maintenance

The Formost Fuji CXII horizontal flow wrapper combines proven technology with smart design to deliver exceptional performance and user-friendly operation. Built for efficiency and reliability, this machine is engineered to meet the demands of modern packaging lines.

Experience the perfect balance of efficiency, dependability, and ease of use with the Formost Fuji CXII flow wrapper.

Formost Fuji CXII Advantages

Energy Savings Induction fin seal heaters provide faster temperature response and superior accuracy, reducing energy consumption while maintaining consistent seals.

Simplified Maintenance The discharge conveyor can be easily removed for quick cleaning and service, saving valuable time and minimizing downtime.

Intuitive Operation A streamlined HMI interface ensures simple, straightforward controls — designed so anyone can operate with confidence.

Versatile Performance Available in rotary and box motion, the CXII wraps a wide range of product sizes and types. Options include high-speed operation, long dwell sealing, and automation integration for maximum flexibility.
