Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Flow Wrapper with Advanced Technology and Easy Maintenance

The Formost Fuji VXII horizontal flow wrapper is engineered for versatility and efficiency in modern packaging operations. Built to meet the demands of multiple industries, the VXII delivers exceptional performance with advanced features that set it apart.

Designed for packaging produce, bakery goods, or specialty items, the VXII horizontal flow wrapper combines innovation, efficiency, and adaptability to keep your production line moving smoothly.

Formost Fuji VXII Advantages

Increased Product Height Capability Package products up to 7.75 inches tall, or even taller with optional configurations.

Energy-Saving Technology Equipped with induction fin seal heaters, the VXII ensures faster temperature response and superior accuracy compared to traditional mould heaters, reducing energy consumption and improving sealing consistency.

Enhanced Production Efficiency

Strength and reliability for continuous operation

Simple operation for ease-of-use

Quick changeover to minimize downtime

Flexibility to adapt to diverse packaging needs
