Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

The state-of-the-art BW Flexible Systems Schib CO 90 horizontal flow wrapper is designed to wrap your protein, nutrition, and snack bars very quickly. This industry-leading flow wrapper has solid construction, easy-to-clean design, and exceptional performance.

The CO 90 can come as a stand-alone machine or ready for integration into your completely automated packaging line.

Automatic feeders and product handling components are available. Options include twin-jaw configuration, automatic film splicer, motorized film pre-feed, reel run out sensor, pre-printed registration, no product - no bag function to minimize film waste, plexiglas guarding for quick inspection, remote service device, and many others.

Features of the Schib CO 90

Hygienic and easy-to-clean design ideal for snack bar packaging

Tool-less removal of guarding and in-feed catch trays allows easy access for cleaning

Fast format changeover with minimal downtime

Allen-Bradley programmable automation controller (other electronic platforms on demand)

10" color touch screen offering user-friendly HMI functionality

Icon-based operator interface with real time diagnostics

450 mm film width

All product contact parts are made of stainless steel or food grade plastics

All stainless steel version on demand

Independent temperature control circuits incorporated into the control panel

Automatic multi-belt feeders are available on demand

Ideal machine for integration into fully automated packaging systems
