Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Compact Kestrel Flow Wrapper Packages a Variety of Products

The Schib Kestrel is BW Flexible Systems' entry-level horizontal flow wrapping machine. Suitable for wrapping a wide variety of food and non-food products, both individually and in multi-packs, the Kestrel HFFS features a compact footprint and is designed to offer a versatile, easy to use packaging solution.

Kestrel is also ready to help reduce waste! Integrated sensors like the "no product, no bag" sensor and the misplaced product sensor help minimize wasted film and product.

Versatile Flow Wrapper

The Kestrel's compact footprint makes it an ideal choice for any packaging environment where space constraints are a consideration. Available in either single or twin jaw configuration, the Kestrel also offers adjustable or fixed folding boxes, giving you plenty of flexibility to customize the Kestrel to your specific requirements.

Intuitive and Easy to Use

The Kestrel is easy to use, easy to maintain, and easy to operate. The Kestrel comes equipped with a panel-based control system with a 5.7" color touch screen and employs an icon-based operator interface with real-time diagnostics. Plus, the straightforward and intuitive set-up of the Kestrel is intentionally designed to produce fast, repeatable changeovers.

Durable and Dependable

The Kestrel's painted steel frame is constructed so that all product contact points are stainless steel or food grade plastic and includes independent temperature control circuits for the long seal rollers and sealing jaws.

Features of the Schib Kestrel

Versatility throughout a wide range of packaging applications
Icon-based operator interface with real time diagnostics
Panel-based control system with 5.7" colour touch screen
No product - no bag' feature minimizes film waste
Straightforward and intuitive set up features for fast, repeatable changeovers
Available with single or twin jaws

Dependable and Flexible Design

Right hand machine (product flow from left to right)
Painted frame, RAL 9007
Single reel / 700mm reel width / 350mm max reel diameter / 76mm reel core
Adjustable and fixed folding boxes available
All product contact parts are stainless steel or food grade plastic

User-Friendly Controls

Panel-based control system with 5.7" color touch screen
