Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Designed for Large Food Products.

The PFM Pulsar is a full-servo horizontal wrapping machine to make pillow-pack bags from a flat roll of wrapping material.

The PFM Pulsar has been designed to wrap products of different sizes and shapes with its LVA feature for automatic adjustment of package length according to product length.

Ideal for green leafy vegetables, pizzas, Christmas cakes, large bologna and salami.

Features

Fast changeover takes a few minutes

Automatic length adjustment (LVA feature) according to product length and print centering

Maximum reel width up to 950 mm and maximum diameter up to 350 mm

Built in AISI 304, all product contact parts can be sanitized and are made with materials complying with FDA regulations

Controlled by two AC and two brushless motors specifically dedicated to the operation of the transverse and longitudinal sealing groups

Transverse sealing section is adjustable

PLC machine functions are controlled via HMI control touch panel

Box motion sealing system prolongs sealing time to guarantee hermetic sealings

50 cycles per minute with LVA feature

Adjustable sealing section can reach a maximum travel of 120 mm

Adjustable forming box

3 sets of fin seal rollers (film pulling, sealing, and folding) with automatic opening of the sealing set
Pneumatic wrapping material reel holder with fine adjustment

Available Versions

Shrink version with trim removal
Poly version for polyethylene (PE)

Options

Date printing unit
Fixed forming box
