Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Small, Fast, Rugged Flow Wrapper

The Redpack NTS top-seal machine is the fastest, smallest, most durable and best performing top-seal flow wrapper in the market.

The Redpack NTS top-seal flow wrapping machine is designed for versatility and easy configuration to flow wrap a variety of products that are difficult to handle.

Often used on field-rigs, the Redpack NTS is robustly built in stainless steel for the tough conditions it is built to endure.

State-of-the-Art Technology

The Redpack NTS top-seal flow wrapping machine has a multi-axis electronic drive system that has a touch screen (HMI) with simple commands for operators to adjust the machine to suit different products. Bag length, print registration, end crimp slow down, infeed position, printed code position, label application control and flowwrapping machine speeds are changed automatically by entering a product code on the HMI.

Simple Fast Product Change Over

Using simple commands, operators quickly adjust the machine to package different products. Recipe storage allows bag length, print registration, end crimp slow down, infeed position, printed code position and machine speed to be changed automatically by simply entering a product name on the

touch screen.

Features

The machine is equipped with independent drives synchronized through the servo-control system.

Machine is fabricated from solid stainless steel base.

Lifting frame integral chassis of flow wrapper.

Independent temperature control of the welding jaw heaters.

Integrated holder for a thermal transfer printer.

Option for integrated label applicator.

Pneumatic film mandrel with a scale for easier and more efficient operation of the machine.

Electronically driven film axis for the most efficient machine operation with the auto film tension.

Electrically adjustable height of the longitudinal welding module.

No product, no bag.

Modem for remote control and machine diagnostics for the fastest response.

Please [contact Pro Pac](#) or call 888-318-0083 for your horizontal flow wrapping equipment.
