Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Flow Wrapper Handles Apples without Trays with Minimal Bruising

The Redpack P325E-FI has been developed to flow-wrap apples, pears and other small round fruit with or without a tray.

The P325E-FI is designed with a frictionless infeed to gently carry fruit to the wrapping module and onto the film to wrap fruits to minimize bruising. The frictionless infeed can be easily adjusted for collations of 4, 6 and 8 apples in soldier pack formation or an in-line pack for variations in apple size grades.

Specially designed soft handling infeed conveyor incorporates driven side belts, two outer platform conveyors and independent central conveyor with product stop for quick tool less adjustment between collation quantities.

Features

Equipped with independent drives synchronized through the servo-control system.

Machine base is manufactured from solid stainless steel.

Tool-less multi-pitch position infeed to accommodate wide range of products.

Independent temperature control of the welding jaw heaters.

Universal integrated holder for a thermal transfer printer, optional.

Integrated label applicator optional.

Modem for remote control and machine diagnostics for the fastest response.

No product, no bag.
Designed to work 24/7.

Please [contact Pro Pac](#) or call 888-318-0083 for your horizontal flow wrapping equipment.
