Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Flow Wrapper Handles Fresh Produce with or without Trays

The Redpack P325E-T trayless flow wrap machine is configured to flow wrapping of fresh produce without a carrying tray in order to save cost, minimise handling, and reduce packaging waste.

The P325E-T trayless flow wrapping machine is renowned as a reliable, versatile, efficient and technically advanced flowrapper.

The P325E-T flow wrapper can be easily adjusted to package fruit wrapped trayed or trayless in-line in various configurations. With its frictionless infeed, the machines ensures that damage to the fruit is kept to a minimum. Originally developed for apples, the P325E-T can wrap almost any graded top fruit including pears, plumbs, kiwi, oranges, lemons, etc.

The Redpack P325E-T trayless flow wrapping machine can be supplied with a choice of drive and control systems and product infeeds to suit your product and production requirements.
