Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Quickly Flow Wrap Chocolates on a Card

Lengths of card are cut and scored on a Redpack card feeder and are fed onto a Redpack flow wrapping machine infeed. The card is formed into an L shape, and chocolates are automatically fed onto the card. The card is then formed into a U shape to encapsulate the chocolate pieces. The chocolate collation assembly is then flow wrapped in cold seal film.

Please [contact Pro Pac](#) or call 888-318-0083 for your horizontal flow wrapping equipment.
