Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Fresh Produce Shrink Wrapping System Designed to Work in the Field

The product, for example broccoli, is conveyed directly into the rig. Operators place the produce onto one of two product infeed conveyors. The product is wrapped on either of two HTS Top Seal flow wrapping machines and conveyed to rotary turntables with box packing stations.

The Redpack field rig shrink wrapping system can be folded up to allow the rig to collapse down to regulation road size when traveling between farms.

Please [contact Pro Pac](#) or call 888-318-0083 for your horizontal flow wrapping equipment.
