Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

High Performance Horizontal Flow Wrapper

The Syntegon Miniwrap 2000 is a horizontal mini-bag form fill and seal machine specifically designed for candies and other confectionery products. With up to 2,000 candies/min this machine moves faster than one's eyes can follow.

The Miniwrap 2000 series provide excellent packaging and sealing quality at all speeds. Other features include patented cross-sealing station, rapid size changes, product flexibility, convenient straightforward operation via touch-screen, easy access for maintenance, and attractive price.

The possibility to perform nearly all adjustments through the colour touch panel makes the handling of the BVK 2000A simple and user-friendly. It is possible to adjust forming, sealing temperature, the print, the print marks position and the position of the product, during the operation of the machine. In addition, the machine is designed to guarantee the highest possible safety for the operator.

Benefits

- Up to 2000 flowpacks per minute
- Excellent package and sealing quality
- Size flexibility
- Easy changeover
- Highest efficiency ratio
- Innovative control system
- High reliability

Easy operation, service and maintenance
