Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

Entry-Level Wrapper with Wide Product Size Range

The Syntegon Pack 101 horizontal flow wrapper is an entry-level wrapper that offers the widest product size range currently available on a flow wrapper in its class. It replaces Syntegon's former entry-level wrapper, the Dobby Stratus, and offers improved flexibility and user friendliness. It is ideal for small- to mid-sized businesses needing a flexible solution that accommodates multiple products.

The all-electronic control of the Pack 101 wrapper's motors and drives, enables quick and easy setup and changeovers, reduces product and film waste during production, and offers low maintenance costs.

It shares production-proven technology applied on Syntegon's higher-end flow wrappers. This flow wrapper furthermore reduces spare parts inventory and lowers the total costs of ownership for customers who wish to scale up with Syntegon's Pack series flow wrappers.

Benefits

Flexible design can handle a wide range of products

Easy set-up, fast changeover

Local manufacturing ensures fast delivery and quick parts and service response

Syntegon's sealing technology for superior seal integrity and package quality

Low maintenance, all servo-motor design

Small footprint
