Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

## Ideal Packaging Machine for Small- and Mid-Range Applications

The Pack 102 is an entry-level horizontal flow wrapper with an output of up to 150 packages per minute, this machine is ideal for small and medium-sized businesses who are taking their first steps in automation or need a flow wrapper to run small batches.

## Multi-Talented Machine for Nearly Any Application

Due to the Pack 102's extremely wide product size range, this wrapper is flexible enough to package small and flat to very large and tall products. It is suitable for nearly any industry, ranging from bakery, bars, biscuits, cookies and crackers, fresh produce, medical devices and more. Change over between different products is straight-forward and in many cases no change parts are required.

## Benefits

Economic entry-level packaging machine for lower production volumes

High quality packages

Standard in stainless steel for ease of cleaning and longer machine life

Easy to operate and requires virtually no routine maintenance

Professional training packages available

Free helpdesk support for troubleshooting

Extensive service technician network with fast responses to service requests

Made and serviced in the USA
