Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

High-Performance Flexible Bucket Labeler

The MFT Automation Impresso Bucket Label Applicator and Conveyor is a highly adaptable labeler. It precisely holds and rotates the container while accurately applying label being transported down a conveyor. Its flexible system can run a wide variety of round or rectangular bucket and label sizes. Easily set the product length, label position, and calibrate with customizable computer controls. This allows for maximum integration with existing production lines to create an advanced production system.

Other features of the Impresso Bucket Label Applicator include quick lock handles for easy adjustments without any tools. Simply unscrew to a new position and lock down. This machine is compact and versatile, handling up to a 20" diameter of roll labels.

Customizable Precise Bucket Labeling for a Variety of Industries

The Impresso Bucket Label Applicator and Conveyor is available for a wide variety of applications and industries, such as pharmaceutical and medical, food, cosmetics, packaging, financial, printing, and robotics.

Customizable computer controls with separate enclosed on-board panel. All-in-one self-contained electronics software platform is flexible to run many different types of applications.

Brushless servo motor for accurate placement and precise control. 1000 watt motors are available for the most demanding applications. Motor upgrades are available depending on the application.

The Bucket Drive Roller next to the peel plate rotates the bucket as the label applicator applies the label. A centering assembly opposite the Bucket Drive Roller extends towards the bucket and holds it in place as labels are adhered.

Features

Precisely holds and rotates the container simultaneously in place while accurately applying labels being transported down a conveyor.

A flexible system running a wide variety of round or rectangular buckets and label sizes. Set product length, label position, and calibrate.

Left, right and top guide rails provide precise product control for different size containers.

Labeler system accommodates wrap-around labels onto a round bucket and flat side labels onto rectangular buckets.

Changeover is quick and easy and can be performed tool-less, use quick lock handles for adjustments. Simply unscrew to a new position and lock down.

Stand-alone labeler or integrates with existing production lines to create a production system.

Highly adaptable software package integrates multiple inputs to achieve accurate label placement at high speeds. Label detection and variable speed correction available with Accutipping.

Small compact versatile design handles up to a 20" diameter roll of labels; 4" or 8" wide available.

Applications

Buckets

Tubs

Packaging

Cartons

Boxes

Folders

And many more

4 Inch Label Specs

Width: 0.39" (10mm) - 3.93" (100mm)

Length: 0.39" (10mm) - 39.37" (1000mm)

8 Inch Label Specs

Width: 0.39" (10mm) - 7.99" (203mm)

Length: 0.39" (10mm) - 39.37" (1000mm)

Specifications

Typical Height	75.6" (1922mm)
Typical Length	80.2" (2037mm)
Typical Width	82.9" (2107mm)
Maximum Speed	Dependent on product
Power	110/220V 50-60Hz 6A
Operating Temp	50° - 95°F (10° - 35°C)
Weight Range	Greater than 250 lbs
