Many options are available. Complete details will need to be finalized to determine requirements and final system costs. Work with your Pro Pac representative to build this machine to your specifications.

High-Performance Conveying System Firmly Secures Product

The MFT Automation VTC conveying system can be one solid belt or configured in individual belt tracks to meet your specific conveying application.

The MFT Automation VTC is powered by a 750 watt brushless servo motor for precise product placement. Optional upgrades to 1000 watts are available.

Features

Designed to firmly control product after it exits the feeder in order to execute secondary operations. Provide better control of irregular product by spreading out product on a flat horizontal conveyor. Standard 2 and 4 meter lengths. Other lengths available.

Linear mounting bars provide quick mounting of optional components, such as inkjet or laser coders, scanners, vision systems and more.

Applications

Transport, bar-coding applications, and UPC over labeling. DVD, Blu-ray, and lenticular affixing. Integration with feeders and more.
